Madayaw na Al-law!

We are deeply honored to be the recipients of the Kingking Mining Corporation's IP Scholarship Program. Thanks to the company's generous support, we are the first among our family members to finish college. Growing up in a less privileged community has not only offered financial and academic challenges, but has also helped us realize the value of a college education. We lived in a mineral resource-rich land and yet we lacked the opportunity to utilize these resources simply because there was no individual in the community who was knowledgeable enough to introduce responsible mining.

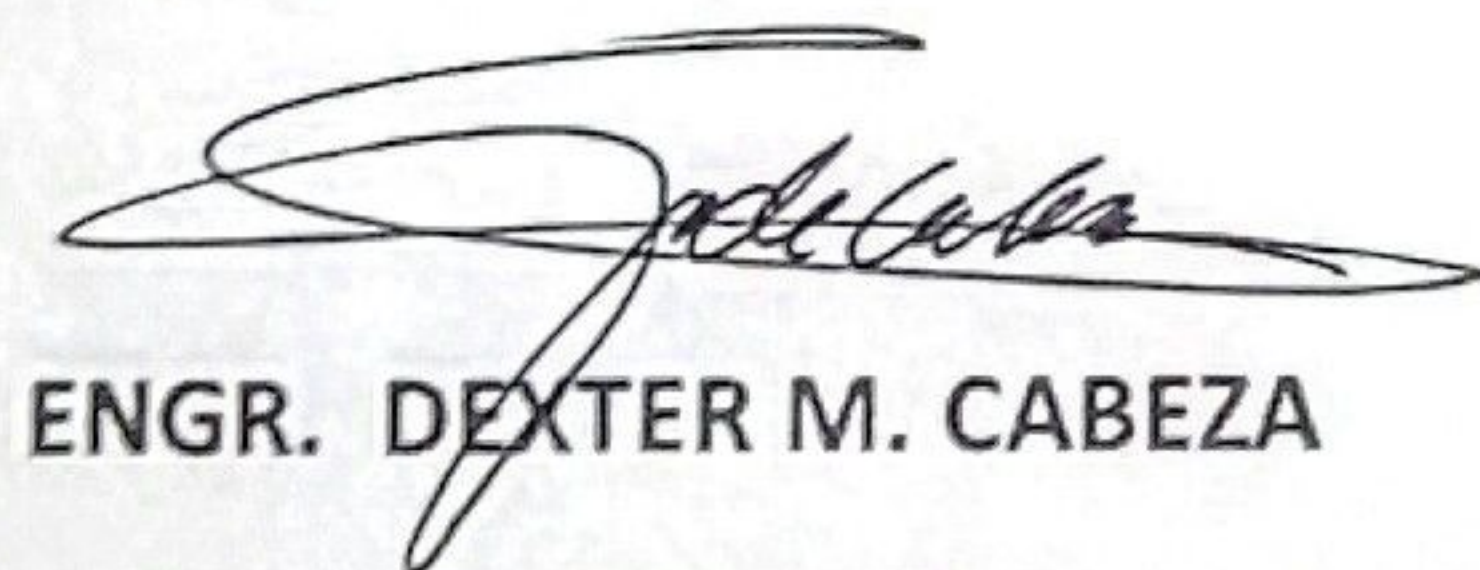

Studying Mining Engineering at the University of Southeastern Philippines was the best avenue for molding not just our technical skills but also our compassion towards people. That is why we also hope to be able to serve our community sometime in the future where we might even have more abilities to help our less fortunate and underrepresented social groups.

Our educational pursuits would not be possible without the generous support from our scholarship sponsor, your company. Thank You for enabling this opportunity, for fulfilling the old dreams of our forefathers and for bringing the new hope of progress. The company helped us to become licensed Mining Engineers and we are the walking proof of sustainable development. We will be forever grateful to the Kingking Mining Corporation.

Sincerely yours,

ENGR. JOHN DARWIN S. AMAG

ENGR. DEXTER M. CABEZA
